Calculation Policy: Subtraction

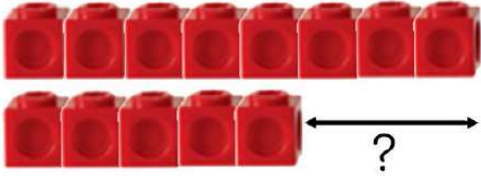

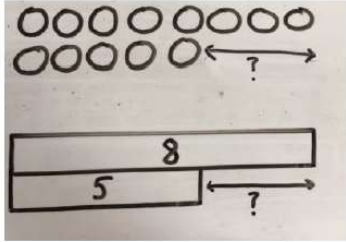

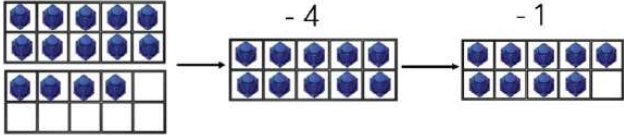

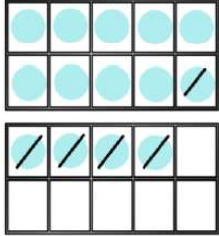

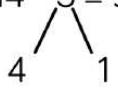

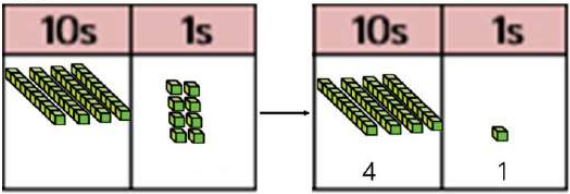

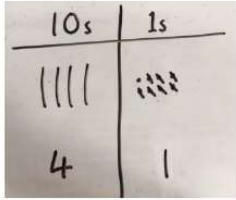

Key vocabulary: take away, less than, the difference, subtract, minus, fewer, decrease.

Concrete	Pictorial	Abstract				
<p>Physically taking away and removing objects from a whole (ten frames, Numicon, cubes and other items such as beanbags could be used).</p> <p>$4 - 3 = 1$</p> 	<p>Children to draw the concrete resources they are using and cross out the correct amount. The bar model can also be used.</p> 	<p>$4 - 3 =$</p> <p> $= 4 - 3$</p> <table border="1" data-bbox="1501 552 1759 617"> <tr> <td colspan="2">4</td> </tr> <tr> <td>3</td> <td>?</td> </tr> </table> 	4		3	?
4						
3	?					
<p>Counting back (using number lines or number tracks) children start with 6 and count back 2.</p> <p>$6 - 2 = 4$</p> 	<p>Children to represent what they see pictorially e.g.</p> 	<p>Children to represent the calculation on a number line or number track and show their jumps. Encourage children to use an empty number line</p>  				

Spire Junior School

Calculation Policy: Subtraction

<p>Finding the difference (using cubes, Numicon or Cuisenaire rods, other objects can also be used).</p> <p>Calculate the difference between 8 and 5.</p> 	<p>Children to draw the cubes/other concrete objects which they have used or use the bar model to illustrate what they need to calculate.</p> 	<p>Find the difference between 8 and 5.</p> <p>8 - 5, the difference is <input type="text"/></p> <p>Children to explore why $9 - 6 = 8 - 5 = 7 - 4$ have the same difference.</p>									
<p>Making 10 using ten frames. $14 - 5$</p> 	<p>Children to present the ten frame pictorially and discuss what they did to make 10.</p> 	<p>Children to show how they can make 10 by partitioning the subtrahend.</p> $14 - 5 = 9$  <p>$14 - 4 = 10$ $10 - 1 = 9$</p>									
<p>Column method using base 10. $48 - 7$</p> 	<p>Children to represent the base 10 pictorially.</p> 	<p>Column method or children could count back 7.</p> <table border="1" data-bbox="1633 1092 1818 1276"> <tbody> <tr> <td></td> <td>4</td> <td>8</td> </tr> <tr> <td>-</td> <td></td> <td>7</td> </tr> <tr> <td></td> <td>4</td> <td>1</td> </tr> </tbody> </table>		4	8	-		7		4	1
	4	8									
-		7									
	4	1

Calculation Policy: Subtraction

<p>Column method using base 10 and having to exchange. 41 - 26</p>	<p>Represent the base 10 pictorially, remembering to show the exchange.</p>	<p>Formal column method. Children must understand that when they have exchanged the 10 they still have 41 because $41 = 30 + 11$.</p>					
<p>Column method using place value counters. 234 - 88</p>	<p>Represent the place value counters pictorially; remembering to show what has been exchanged.</p>	<p>Formal column method. Children must understand what has happened when they have crossed out digits.</p>					
<h3>Conceptual variation; different ways to ask children to solve 391 - 186</h3>							
<table border="1" style="margin-left: auto; margin-right: auto;"> <tr> <td style="text-align: right;">391</td> <td></td> </tr> <tr> <td style="text-align: right;">186</td> <td style="text-align: right;">?</td> </tr> </table>	391		186	?	<p>Raj spent £391, Timmy spent £186. How much more did Raj spend?</p> <p>Calculate the difference between 391 and 186.</p>	<p>$\square = 391 - 186$</p> <p>391 -186 ——</p> <p>What is 186 less than 391?</p>	<p>Missing digit calculations</p>
391
